

HSEQ POLICY STATEMENT

The objective of our Quality Management System is to help sustain Cargo Services' market leadership position within stevedoring and warehousing services. This is characterized by Cargo Service through the following focus areas:

- Cargo Service provides and surpasses the service customers expect and require of us.
- Cargo Service represents a quality conscious and professional supplier and partner.
- Cargo Service ensures that the operations we perform are not hazardous to our employees, customers' goods, the environment or any third party and its property.
- At any given time Cargo Service complies with the applicable laws and regulations under which we operate, including health and safety legislation and regulations concerning loading and unloading of bulk commodities.
- At all times Cargo Service highly values safety, work environment and the environment by continuously planning, executing, auditing and enhancing our actions in order to achieve higher quality standards.
- Cargo Service is committed to continuously enhance the effectiveness of the Quality Management System.
- The Quality Management System is certified in compliance with the ISO 9001 standards and the Maritime Administration Technical Regulation No 6.
- The Quality Management System does fulfil applicable legal requirements and help to improve the safety of bulk carriers calling at Cargo Services' terminals for loading or unloading of solid bulk cargo, by preventing endangering the ships' structure being subject to over capacitation or physical damage during loading or unloading.
- The Quality Management System ensures the safety procedures that are implemented for Project cargo and other goods are handled according to customers' requirements. This also applies when using the instructions that are in accordance with the processes constituted in this Quality Management System and without being a hazard to people that handle cargo, nor cause damage to cargo, the environment or any third party and its property.
